FIRETS 法瑞测试设备

FRTS-20285

Smoke Toxicity Test Apparatus

Smoke Toxicity Test Apparatus

STABLE SMOKE / TOXICITY EVALUATION

Organise controlled smoke generation for toxicity assessment.

Establish controlled heating, material decomposition and smoke transfer for material-smoke toxicity work. The supply boundary should match the complete laboratory method, including the interfaces needed for exposure and assessment.

Principle

The specimen and tube furnace are arranged to generate smoke under the specified programme.

System

Tube furnace, specimen transport, temperature control and smoke-transfer components.

Application

Building and decorative materials, method development and laboratory programmes organised around GB/T 20285.

Original equipment photograph. Appearance only.

Sichuan Farui Testing Equipment Co., Ltd.

01 / PRODUCT / APPLICATION

Product purpose and selection

Establish controlled heating, material decomposition and smoke transfer for material-smoke toxicity work. The supply boundary should match the complete laboratory method, including the interfaces needed for exposure and assessment.

Original equipment photograph. Appearance only.

PRINCIPLE & EVALUATION SCOPE

Measurement principle

The specimen and tube furnace are arranged to generate smoke under the specified programme.

Measurement principle

The specimen and tube furnace are arranged to generate smoke under the specified programme. Controlled air and gas transfer connect generation to the downstream exposure or analysis stage.

Use in the laboratory

Tube furnace, specimen transport, temperature control and smoke-transfer components. Downstream exposure and evaluation facilities are defined separately in the project scope.

English edition follows the reviewed Chinese manuscript evidence. Configuration and laboratory conditions follow the technical file confirmed by both parties. Unconfirmed numerical claims from the Chinese edition are not restated here.

HARDWARE & GAS PATH

Hardware arrangement

Tube furnace, specimen transport, temperature control and smoke-transfer components.

Original equipment photograph. Appearance only.

Hardware arrangement

Tube furnace, specimen transport, temperature control and smoke-transfer components. Downstream exposure and evaluation facilities are defined separately in the project scope.

Use in the laboratory

Building and decorative materials, method development and laboratory programmes organised around GB/T 20285.

SPECIMENS & CONDITIONING

Specimens and conditioning

Building and decorative materials, method development and laboratory programmes organised around GB/T 20285.

Specimens and conditioning

Building and decorative materials, method development and laboratory programmes organised around GB/T 20285.

Use in the laboratory

Define the apparatus supply boundary, specimen preparation, smoke-generation conditions and downstream interfaces. Keep generation, exposure and result records linked to the same test.

English edition follows the reviewed Chinese manuscript evidence. Configuration and laboratory conditions follow the technical file confirmed by both parties. Unconfirmed numerical claims from the Chinese edition are not restated here.

HEATING CALIBRATION & PRETEST

Calibration and verification

Tube furnace, specimen transport, temperature control and smoke-transfer components.

01 Calibration and verification

Tube furnace, specimen transport, temperature control and smoke-transfer components. Downstream exposure and evaluation facilities are defined separately in the project scope.

02 Use in the laboratory

Define the apparatus supply boundary, specimen preparation, smoke-generation conditions and downstream interfaces. Keep generation, exposure and result records linked to the same test.

English edition follows the reviewed Chinese manuscript evidence. Configuration and laboratory conditions follow the technical file confirmed by both parties. Unconfirmed numerical claims from the Chinese edition are not restated here.

STEPWISE TEST WORKFLOW

Test sequence

The specimen and tube furnace are arranged to generate smoke under the specified programme.

01 Test sequence

The specimen and tube furnace are arranged to generate smoke under the specified programme. Controlled air and gas transfer connect generation to the downstream exposure or analysis stage.

02 Use in the laboratory

Define the apparatus supply boundary, specimen preparation, smoke-generation conditions and downstream interfaces. Keep generation, exposure and result records linked to the same test.

CONCENTRATION & SMOKE YIELD

Calculation and reported quantities

GB/T 20285 toxicity assessment is distinct from optical smoke density and from FTIR concentration measurements.

01 Calculation and reported quantities

GB/T 20285 toxicity assessment is distinct from optical smoke density and from FTIR concentration measurements. Those outputs do not replace the complete assessment procedure or its required laboratory facilities.

02 Use in the laboratory

Define the apparatus supply boundary, specimen preparation, smoke-generation conditions and downstream interfaces. Keep generation, exposure and result records linked to the same test.

English edition follows the reviewed Chinese manuscript evidence. Configuration and laboratory conditions follow the technical file confirmed by both parties. Unconfirmed numerical claims from the Chinese edition are not restated here.

CLASSIFICATION & ENDPOINTS

Classification boundary

GB/T 20285 toxicity assessment is distinct from optical smoke density and from FTIR concentration measurements.

01 Classification boundary

REAL CONTROLS & DATA TRACEABILITY

Software records

Define the apparatus supply boundary, specimen preparation, smoke-generation conditions and downstream interfaces.

What the screenshots show

These screenshots are original captures from the reviewed Chinese edition. They illustrate operating, recording or reporting functions available in that software. Displayed readings remain examples from the captured session.

Original equipment photograph. Appearance only.

How to read them

Define the apparatus supply boundary, specimen preparation, smoke-generation conditions and downstream interfaces. Keep generation, exposure and result records linked to the same test.

12 / COMPANY

High-tech enterprise

Sichuan Farui Testing Equipment Co., Ltd. holds a High-tech Enterprise certificate. Its work covers fire-protection and material fire-test equipment, measurement and control software, and laboratory system integration.

Original High-tech Enterprise certificate. Dates and identifiers follow the certificate as issued.

Certificate number

GR202551000122

Issue date

2025.12.02

Stated validity

Three years

Issue date and validity are shown as stated on the certificate.

13 / COMPANY

Quality management system

From technical requirements through on-site use, Farui organises instrument development, assembly and service within the certified management-system scope, connecting requirement confirmation, technical implementation and project delivery.

注册号：30924Q0210R0S

质量管理体系认证证书

兹证明

四川法瑞检测设备有限公司

统一社会信用代码：91510703MA6Z473E4K

注册地址：绵阳市涪城区剑安路 35 号（科技城软件产业园）

审核地址：四川省绵阳市游仙区科学城中经路 52 号辅助房 12、13 号

质量管理体系 符合

GB/T19001-2016 idt ISO9001:2015 标准要求

该管理体系认证所覆盖的范围为：

工业自动控制系统仪器装置的研发、组装及服务

该组织分场所信息：

"无"

获证组织在证书有效期内每年至少接受一次本认证机构的监督审核，并将监督审核合格标志粘贴于证书指定位置，此证书方可持续有效。本证书有效性请登录 http://cx.cnca.cn 查询

颁证日期：2024 年 06 月 06 日　　有效期至：2027 年 06 月 05 日

国评认证（成都）有限公司　　签发人：

地址：成都高新区[illegible]7 层 8 号

Original quality-management-system certificate. This is a company-system certificate, not product certification.

Certified standard

GB/T 19001-2016 / ISO 9001:2015

Certified scope

Research, assembly and service of industrial automatic-control system instruments

Registration number

30924Q0210R0S

Stated validity on the certificate

2024.06.06 — 2027.06.05

This page records the company management-system certificate. Coverage and current standing remain those registered by the certification body.

14 / COMPANY

Industry participation

As a senior member of the Smart Laboratory Professional Committee of the China Association for Standardization, Farui follows test standards and smart-laboratory practice, connecting industry exchange with instrument design, measurement and technical service.

Original senior-membership certificate of the Smart Laboratory Professional Committee.

Membership and organisation

Senior member, Smart Laboratory Professional Committee, China Association for Standardization

Issue date

2026.07.21

Stated validity on the certificate

2027.07.20

Membership is shown as registered on the original certificate and its stated validity date.

15 / COMPANY

Research and standards participation

Around flame retardancy, fire protection and measurement systems, Farui continues to accumulate instrument-design, automatic-control and test-method experience, using research and standards participation in technical discussion and system design for complex tests.

8 Invention patents (count)

4 Utility models (count)

4 GB/T participation (count)

From method to apparatus

Test conditions, measured quantities and use cases are translated into configuration options, with the test method as the starting point for technical discussion.

From signal to record

Data acquisition, control software and combined systems are organised so that original signals, operating conditions and reported results remain corresponding.

Figures follow the April 2026 company introduction. Patent applications are not distinguished from granted patents. Participation lists follow the corresponding documents.

CONTACT / FIRETS

Contact Farui

Discuss selection against the intended method, material and specimen form, measurement and reporting needs. Supply configuration and laboratory conditions follow the technical documents confirmed by both parties.
